

**CONTINENTAL INDUSTRIES STRENGTHENS IT'S MARKET
PRESENCE THROUGH NEW EQUIPMENT INVESTMENT**

CI acquires AMADA LC-3015FI NT Laser Cutting Machine

Anaheim, CA, Dec. 28, 2016– Continental Industries, a leader in precision sheet metal fabrication is proud to announce the acquisition of an Amada LC-3015FI NT Laser Cutting Machine to its mfg. facility. The laser will be installed and fully operational in January 2017.

The 4000 watt LC-3015 laser is equipped with 3-axis linear motor drive system, cut process monitoring, twin-adaptive optics, and Amada tuned oscillator making it an ultra-fast, ultra-precise, full range laser cutting system.

"The addition of laser cutting technology allows us to better position ourselves for continued growth, offer faster turnaround times, fuel manufacturing innovation, and better serve our growing customer base". Mike Moss, Director of Sales

Continental Industries is no stranger to expansion. Dubbed "One of Orange County's Fastest Growing Private Companies" for revenue growth by the Orange County Business Journal in 2012, 2013, 2014, 2015 and 2016. Continental is currently in the midst of exciting growth that can be seen in a variety of forms.

They made a move to a fully renovated 25,000-square-foot building for added workspace. Even more recently, Continental acquired a complementary company in the sheet metal fabrication industry. Since that strategic acquisition, personnel, assets, and customers have been merged to increase the volume of business and enter new market segments.

For over three decades Continental Industries has offered world class design, engineering, prototyping and fabrication services to customers in the southern California area making them a powerful resource in the industry.
